About Me

Get Your Resume to Your Employer

*REFEM, short for *résumé*-followup-email-manager is an app that allows you to send potential employers (maybe the recruiters), a followup email just to remind them that you are still interested in the Job in Question.

About *REFEM

REFEM, short for résumé-followup-email-manager is an app that allows you to send potential employers (maybe the recruiters), a followup email just to remind them that you are still interested in the Job in Question.

SneakIN

Tools

React, Redux,
Styled-component, Firebase,
Cypress (E2E testing)

A stand-alone chatting-engine built from scratch. The idea behind this application was to take features from Whatsapp, Slack, and Telegram in building a hybrid-like Chatting System without depending on any form of external chatting SDK like Stream, SendBird including the Big Good Wolf, Chat Engine.

Competitive Versions

Versions of different technologies where features were extracted :

Tech	Type	Description
Whatsapp	web/apk	2.21.17.2
Slack	apk	21.08
Telegram	web/apk	Desktop 2.9.2 av.

JointAccessProgrammer

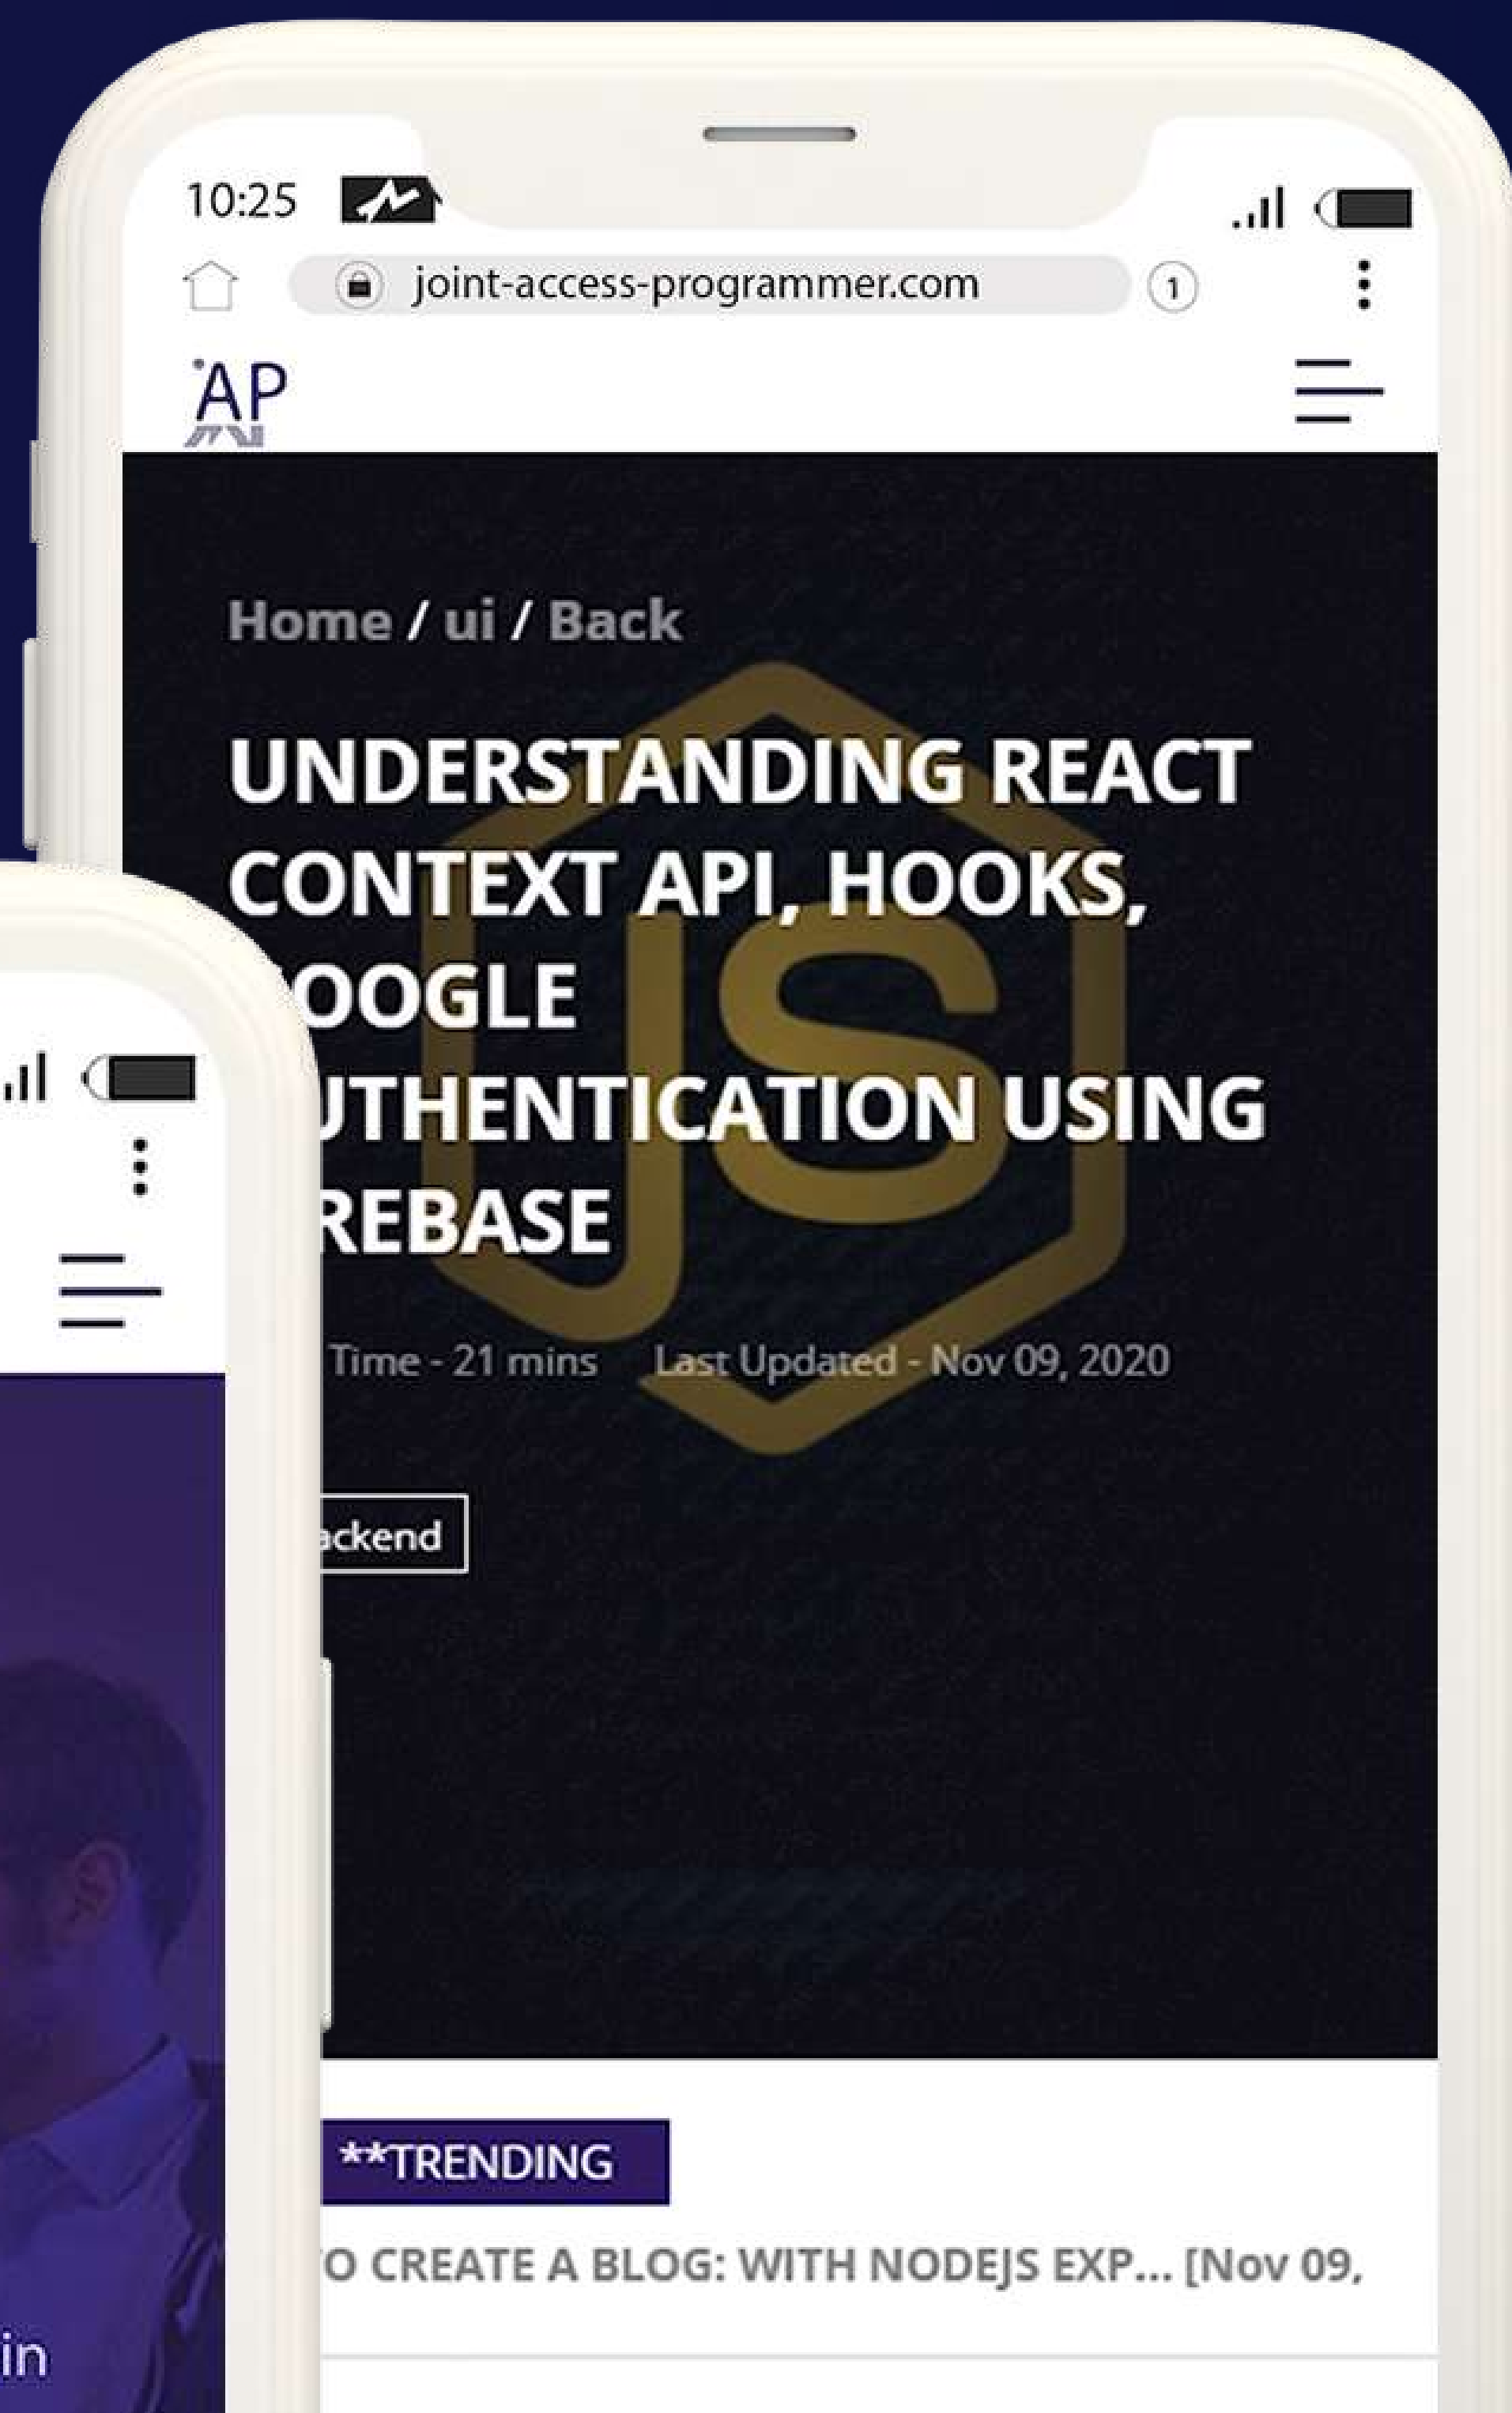

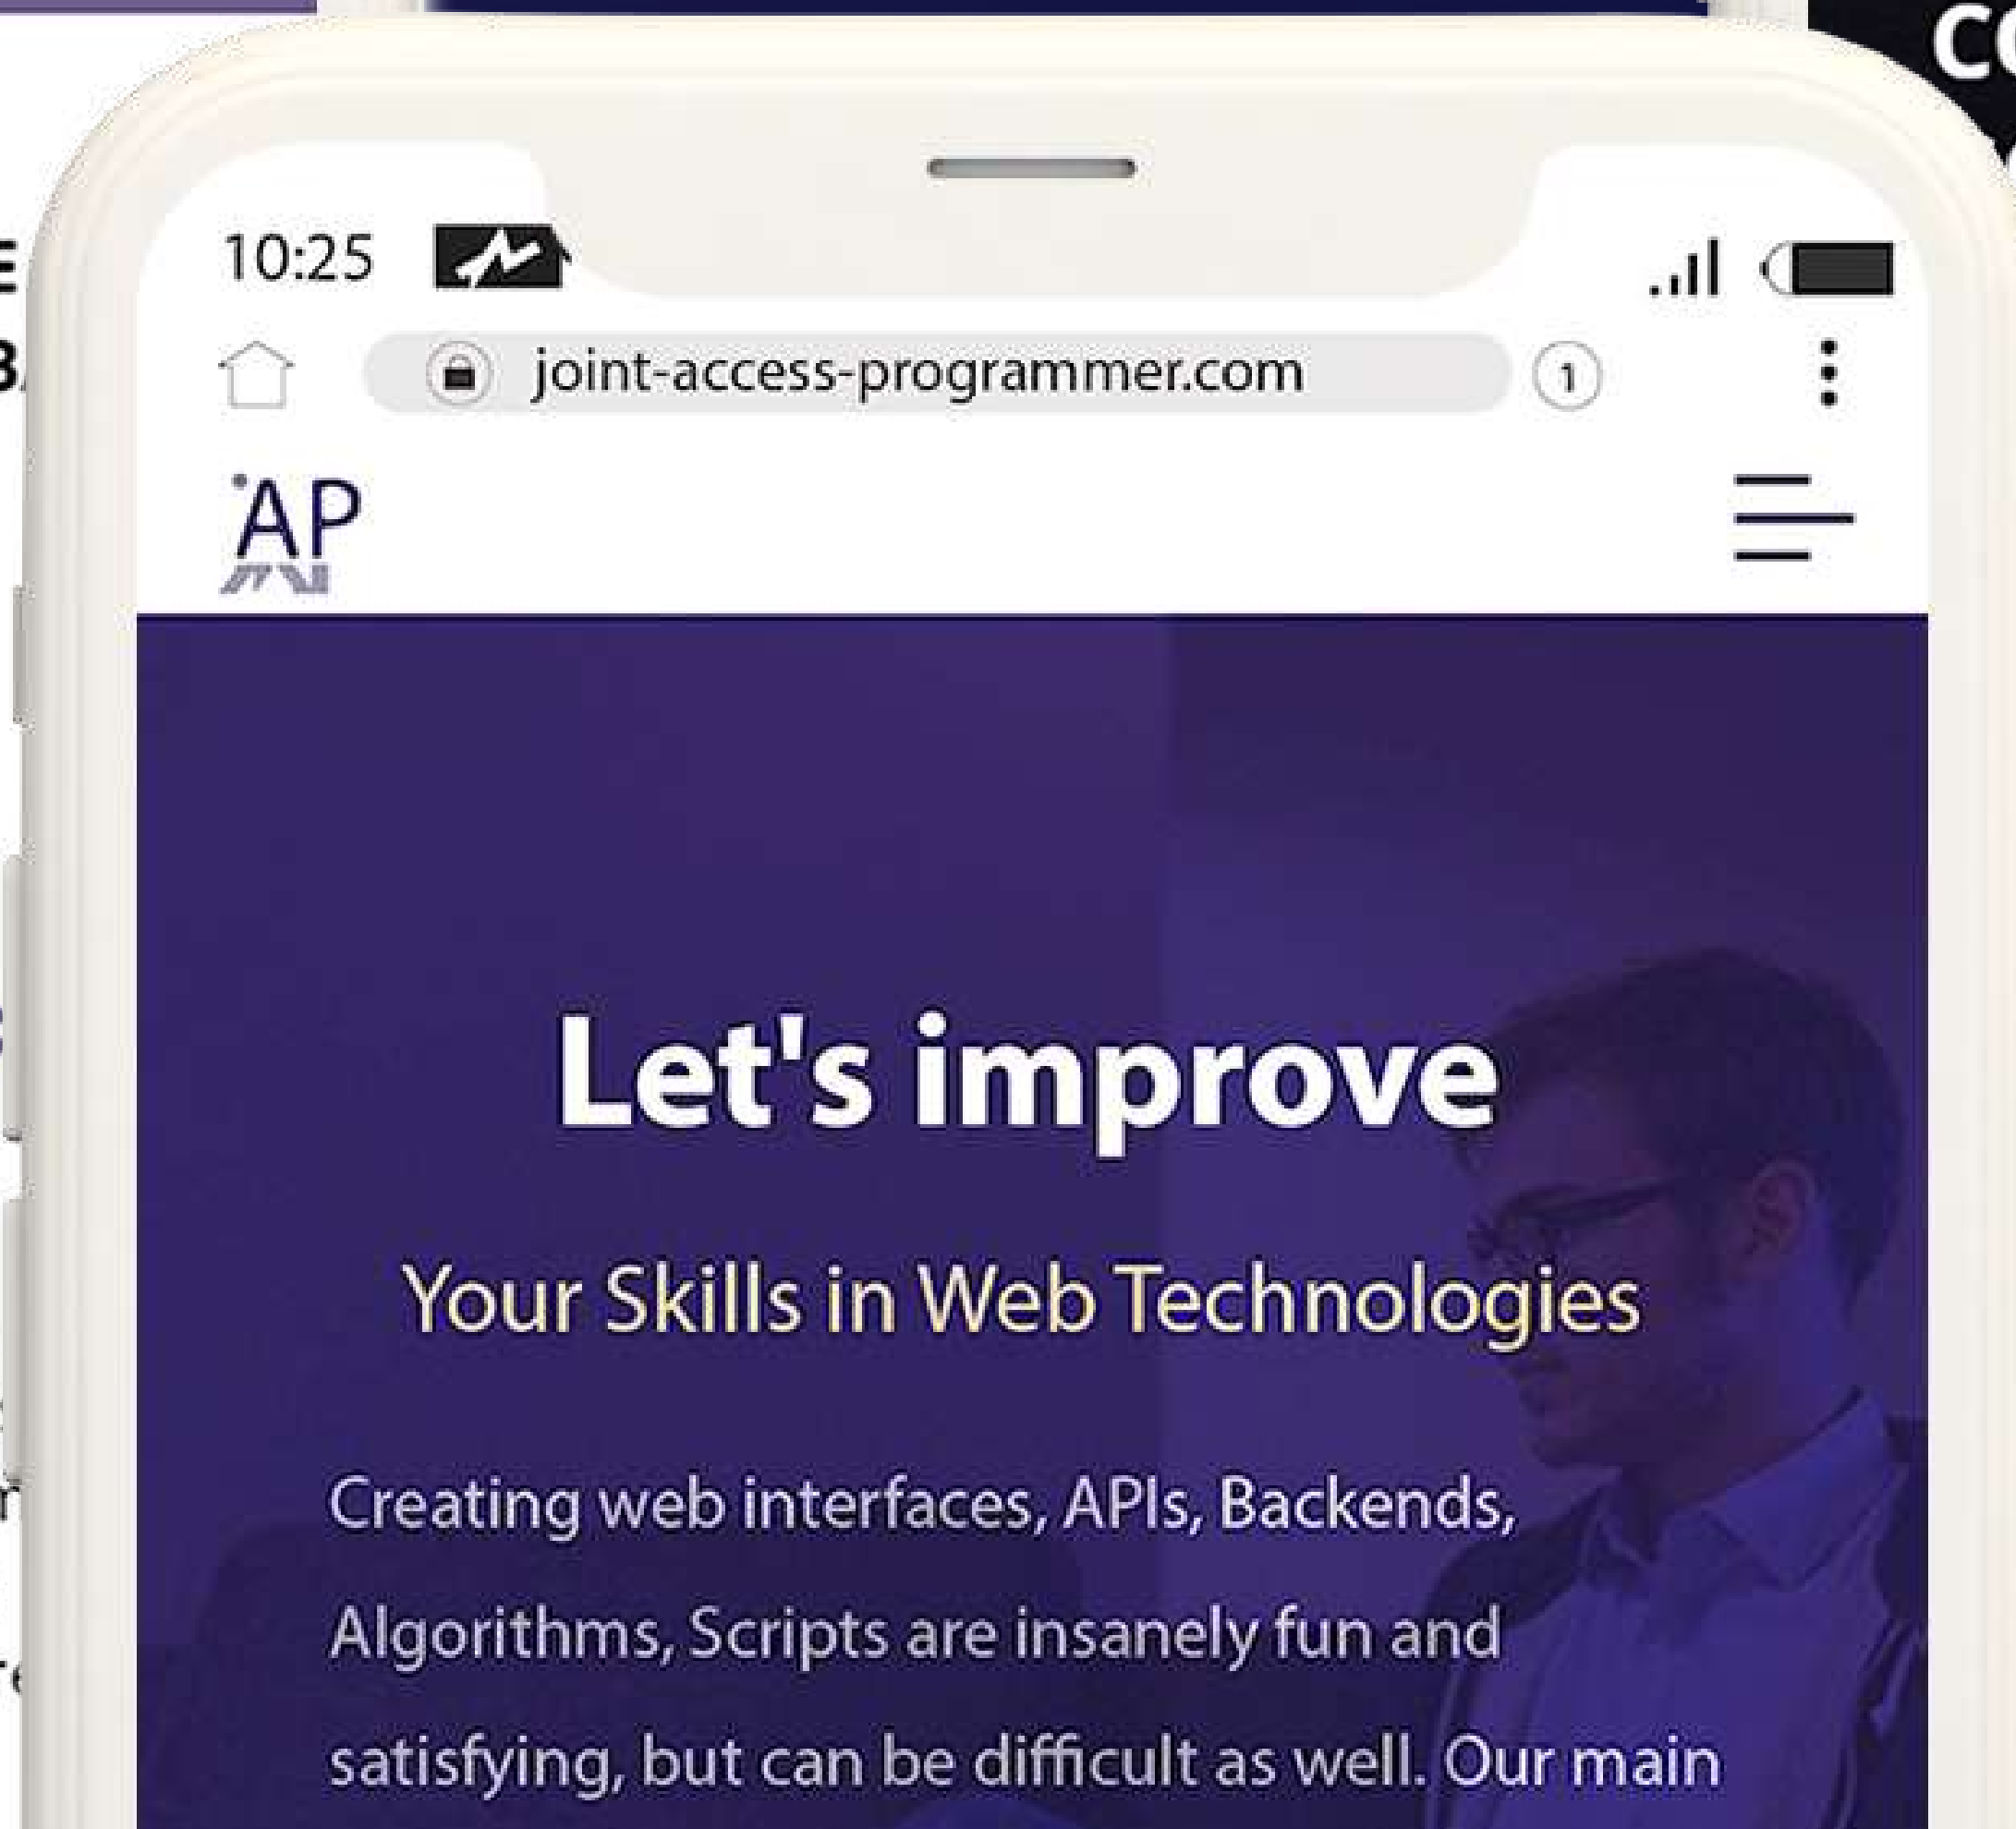

★ UNDERSTANDING REACT CONTEXT API, HOOKS, GOOGLE AUTHENTICATION USING FIREBASE

Read Time - 21 mins
Last Updated (Nov 09, 2020)

Prop drilling and ContextAPI in React

We basically use the **Context API** to prevent **Prop drilling**. Prop drilling is simply passing `props` down from parent component to other children components that depend on the props manually no matter how deep.

Tools

Django, jQuery

A blog application made specifically for developers, it was built with Pure CSS for the UI, jQuery utilized for DOM manipulation and general interactivity, and subtle animations for small interactions. It is a Progressive web application (PWA) and as such, cached pages can be accessed even when offline.

Creating web interfaces, APIs, Backends, Algorithms, Scripts are insanely fun and satisfying, but can be difficult as well. Our main goal is to break down these heinous tasks simply plain.

SnippetHighlighter

SnippetHighlighter

Tools

Django, Pygment, jQuery

Snippet Highlighter is a web application that converts raw source codes into fancy HTML that can be used directly in your blog, email or anywhere you intend to drop a quick code snippet. The generated code is relatively responsive and scalable. Advance customization is available in the advance options below.
